DETAILED ACTION

1. Claims 1-2 and 4-10 are presented for examination on 8/4/09.
2. Claims 15-18 and 19-24 are cancelled.
3. Claims 1-2 and 4-10 are now allowed.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: claims 1-2 and 4-10 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims, specifically *"for each of the first reconfigurable interconnect stages, a corresponding one of a plurality of second reconfigurable interconnect stages each having a plurality of inputs coupled to a first subset of the outputs from only the corresponding first reconfigurable interconnect stage, and further having a plurality of outputs, wherein a first subset of the outputs from each second reconfigurable interconnect stage are coupled to a first subset of the inputs of only the corresponding first reconfigurable interconnect stage via a plurality of feedback paths; a third reconfigurable interconnect stage having a plurality of inputs coupled to a second subset of the outputs from the second reconfigurable interconnect stages, wherein the plurality of feedback paths each couples one of the outputs of the second reconfigurable interconnect stages to one of the inputs of the first reconfigurable interconnect stages without passing through the third reconfigurable interconnect stage; and memory, wherein the reconfigurable interconnect network is*

configured to dynamically re-configure the first, second, and third reconfigurable interconnect stages in accordance with a content of the memory" as disclosed in independent claims 1, 4, 6 and 8 of the instant application (as defined in Fig.8 (showing SRAM-1 connected to *first reconfigurable interconnect stages*), Fig.9 (showing SRAM-2 and SRAM-3 connected to respective *second reconfigurable interconnect stages* and *third reconfigurable interconnect stages*), Fig.10 (showing the complete picture of the *reconfigurable interconnect stages*) and in specification [42]-[55] of the instant application).

5. A practical application for the invention is disclosed in specification [01].

Prior Art of Record

6. The Prior art of references by Barbier (et al) (US Patent #5,574,388, US 5754827 A, US 6717433 B2, US 6388465 B1, US 5907697 A) discloses an apparatus for two-level two-stage inter-board crossbar network is provided to interconnect the logic boards or I/O boards for interconnecting the logic elements to external devices. Finally, a single-stage inter-backplane network and a number of PCBs are provided to interconnect multi-backplanes to form a multi-crate system, however all of them fail to show that each reconfigurable interconnect stage (crossbar) network is dynamically re-configurable using in accordance with a content of the memory. At most only one stage (See US Patent #5,574,388, Fig.3 elements Memory 112 and *reconfigurable interconnect stage/crossbar 104*) is shown to be configurable. Further reasons for allowance is the order/manner the first, second and third interconnects are connected to each other (as shown in the Fig.8-10 of instant invention along with

them memory for each stage) is not shown by any of the prior art references on record.

7. The Prior art of references by Chan (et al) (US Patent # US 6545505 B1) shows programmable interconnect (Fig.2 Prior Art) but does not show explicitly the exact configuration claimed in the independent claims 1, 4, 6 and 8.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
